Patent / patent application title	PROCESS FOR PRUNING BRANCHES OF FRUIT TREES
Authors	BALAN VALERIAN, MD; IVANOV IGOR, MD; BALAN PETRU, MD; BÎLICI INNA, MD
Patent / patent application N°	MD 1190. 2017-09-39
Description	<p>Invenția se referă la pomicultură, și anume la un procedeu de tăiere a ramurilor pomilor fructiferi. Procedeu, conform invenției, include reînnoirea ramurii de semischelet în lemn de 3...4 ani prin tăiere la cep deasupra inelului cambial, perpendicular direcției de creștere a ramurii.</p> <p>The invention relates to fruit growing, in particular to a process for pruning branches of fruit trees. The process, according to the invention, comprises the renewal of the semi-scaffold branch with 3...4-year-old wood by stump pruning above the cambial ring, perpendicular to the direction of growth of the branch.</p>
Domain	Horticulture
