

Ghid de utilizare SPRINGERLink

Valentina Nastas

Biblioteca Tehnico-științifică, UTM

Baze de date. Definiție. Clasificare

Baza de date este unul dintre instrumentele fundamentale utilizat pentru organizarea informației.

Baza de date reprezintă o colecție de date organizate pentru a facilita **căutarea și regăsirea rapidă** prin intermediul calculatorului.

Fiecare **sistem de regăsire a informației** asigură accesul la un set de documente.

Un **document** reprezintă un obiect care este regăsit de un sistem de regăsire a informației.
Ex.: carte, revistă, articol, capitol.

După funcția îndeplinită, bazele de date științifice pot fi :

➤ **Baze de date bibliografice** (de referință) – conțin date bibliografice și suplimentare referitoare la cărți, articole din periodice, rapoarte, lucrări de la conferințe, disertații, brevete, etc.

➤ **Baze de date tip sursă** pot fi:

☑ **full-text** – care conțin textul integral sau fragmente din documente (cărți, articole etc);

☑ **numerice** - care furnizează statistici, date financiare, rezultate ale diverselor studii, proprietăți fizice sau chimice ale substanțelor.

Interacțiunea cu **baza de date online** este asigurată prin intermediul interfeței cu utilizatorul. În urma parcurgerii unor articole eligibile, utilizatorul își poate rafina (detalia) cererea de informații precum și modul de interogare a sistemului.

SpringerLink

Ghidul în cauză are scopul să familiarizeze potențialii utilizatori cu procesul de căutare și regăsire a informației în baza de date *SpringerLink* - platformă cu publicații electronice editate de editura *Springer*.

SpringerLink este o bază de date interactivă ce reunește biblioteci virtuale grupate pe domenii. Platforma de cercetare **SpringerLink** pune la dispoziție *reviste*, *cărți* și *lucrări de referințe* din domeniul științei, tehnicii și medicinei.

Domenii acoperite:

- ⇒ inginerie,
- ⇒ arhitectură și design,
- ⇒ matematică și statistică,
- ⇒ fizică și astronomie,
- ⇒ chimie și știința materialelor,
- ⇒ știința calculatoarelor,
- ⇒ științe biomedicale și medicale,
- ⇒ științe comportamentale,
- ⇒ afaceri și economie,
- ⇒ mediu înconjurător,
- ⇒ științe umane,
- ⇒ științe sociale și drept.

Pagina principală (*Home Page*)

➔ Accesarea platformei SpringerLink
<http://link.springer.com>

➔ Interfața este alcătuită din 4 diviziuni:

A. Diverse Opțiuni

- (1) trimitere către logare;
- (2) limba de afișare;
- (3) tipul de ediție *Academic/Corporation*;
- (4) opțiuni de căutare;
- (5) revenire la pagina principală;
- (6) date de contact;

B. Posibilități de **Răsfoire** (*Browse*) după disciplină sau tip de publicație;

C. Aria de **Conținut** (*Content Area*);

D. Informații legate de editura *Springer*.

The screenshot shows the Springer Link homepage with several key features highlighted by orange boxes and letters:

- A (Diverse Opțiuni):** Located at the top, it includes the Springer Link logo, a search bar (5), and navigation links for Home and Contact Us (6). It also features a language selection dropdown (2) and a sign-up/login link (1).
- B (Posibilități de Răsfoire):** A vertical sidebar on the left titled "Browse by discipline" (B) lists various fields such as Architecture & Design, Astronomy, Biomedical Sciences, Business & Management, Chemistry, Computer Science, Earth Sciences & Geography, Economics, Education & Language, Energy, Engineering, Environmental Sciences, Food Science & Nutrition, Law, Life Sciences, Materials, Mathematics, Medicine, Philosophy, Physics, Psychology, Public Health, Social Sciences, and Statistics.
- C (Aria de Conținut):** The main content area (C) features a banner for "Providing researchers with access to millions of scientific documents from journals, books, series, protocols and reference works." Below this are sections for "Featured Journals" (including "Journal of Arid Land" and "Metastatic Neoplasms in Fine-Needle Aspiration Cytology") and "Featured Books" (including "Gender and Couple Relationships", "Employer Branding for KMU", "Migration - Religion - Identität, Aspekte transkultureller Prozesse", and "Biographie - Religion - Bildung"). A pink banner states "New books and journals are available every day."
- D (Informații legate de editura Springer):** The footer (D) contains "Our Content" (Journals, Books, Book Series, Protocols, Reference Works), "Other Sites" (Springer.com, SpringerProtocols, SpringerReference), "Help & Contacts" (Contact Us, Helpdesk), and a Springer logo.

Providing researchers with access to millions of scientific documents from journals, books, series, protocols and reference works.

transactions

Enterprise as an Instrument of Civilization

(1)

New books and journals are available every day.

Aria de conținut are două scheme de culori pentru a semnaliza dacă utilizatorul este recunoscut sau nu.

1. **Culoarea oranj** reprezintă un utilizator anonim.

2. **Culoarea roz** reprezintă un utilizator recunoscut.

➤ Când utilizatorul accesează <http://link.springer.com> de la un calculator cu IP cunoscut de platforma *SpringerLink*, automat este recunoscut ca fiind utilizator al instituției* care este abonată la publicațiile *Springer*.

Providing researchers with access to millions of scientific documents from **journals, books, series, protocols and reference works.**

New books and journals are available every day.

Există două metode de căutare într-o bază de date:

1. Interogarea poate fi:

- a. identificarea (punerea în corespondență) pe bază de frază sau
- b. identificarea prin cuvinte cheie.

2. Baleierea informației – permite utilizatorilor să scaneze liste de termeni, antete/titluri pentru a regăsi teme sau articole de interes.

Opțiuni de căutare

1. Căutare simplă (*Search*)
2. Căutare avansată (*Advanced Search*)

Termenul/termenii căutați pot apărea în titlu, în rezumat, în textul documentului etc.

Remarcă: Implicite la căutarea documentelor se vor returna titlurile care conțin termenii scriși în câmpurile de căutare fără a ține cont de drepturile de acces la resursele platformei *SpringerLink*.

Căutarea avansată (*Advanced Search*)

Advanced Search

Find Resources

with **all** of the words (2)

(a)

with the **exact phrase**

(b)

with at least **one** of the words

(c)

without the words

(d)

where the **title** contains

(e)

e.g. "Cassini at Saturn" or Saturn

where the **author / editor** is

(f)

e.g. "H.G.Kennedy" or Elvis Morrison

The Ethics of Counterfeiting in the Fashion Industry: Quality, Credence and Profit Issues (5)

Brian Hilton, Chong Ju Choi, Stephen Chen (6)

» Download PDF (96 KB)

Abstract (7)

One of the greatest problems facing luxury goods firms in a globalizing market is that of counterfeiting. The purpose of this paper is to analyze the different types of counterfeiting that take place in the fashion industry and the ethical issues raised. We argue that the problem partly lies in the industry itself. Copying of designs is endemic and condoned, which raises several ethical dilemmas in passing judgment on the practice of counterfeiting. We analyze the ethical issues in a number of different types of counterfeiting encountered in the fashion industry. We conclude with some observations on the general implications for ethics in intellectual property rights.

Board Diversity and Corporate Social Responsibility

Maretno Harjoto · Indrarini Laksmana · Robert Lee

Received: 5 April 2014 / Accepted: 22 August 2014 / Published online: 29 August 2014
© Springer Science+Business Media Dordrecht 2014

Abstract This study examines the impact of board diversity on firms' corporate social responsibility (CSR) performance. Using seven different measures of board diversity across 1,489 U.S. firms from 1999 to 2011, the study finds that board diversity is positively associated with CSR performance. Board diversity is associated with a greater number of areas in which CSR is strong and a fewer number of areas in which CSR is a concern. These findings support the stakeholder theory and are consistent with the view that board diversity enhances firms' ability to satisfy the needs of their broader groups of stakeholders. We find that gender, tenure, and expertise diversities seem to be the

Introduction

Recently, diversity in corporate boardrooms of publicly traded corporations around the world has become a pressing issue. Several developed countries, such as the United States and the European Union countries, now require corporations to improve their board diversity practices and the disclosure of these practices.¹ In the U.S., the SEC adopted a new set of rules mandating publicly traded

Abstract

(3)

Consumers demand not only specific functionalities and quality levels for textile products but also safety and ecology. In response to this trend, the fashion supply chain places more and more importance on sustainability, forcing textile producers to respect high environmental and social standards in the entire textile-clothing chain, from raw materials to retail. In some cases, the consumer and postconsumer (reuse, recycle, disposal) phases are also considered. To answer the needs of consumers of eco-friendly products, several eco-labeling systems have been developed, which include specific requirements for "organic" textiles. This chapter presents an overview of the requirements of the major eco-labels that are used a, including the European Union Ecolabel (flower label), Oeko-Tex 100 (and the new certification scheme Sustainable Textile Production), Bluesign, organic certification systems (Global Organic Textile Standard and Organic Content Standard), Fairtrade, and labels from retailer chains (Clear to Wear and Ecosafe).

Keywords

Textiles – Ecolabel – Organic certification – Sustainability – Health and safety – Social responsibility – Environmental protection
