Microelectronic Pyroelectric Measuring Transducers

A.O. Semenov, S.V. Baraban, O.V. Osadchuk, O.O. Semenova, K.O. Koval, and
A.Yu. Savytskyi

*Faculty for Infocommunications, Radioelectronics and Nanosystems, Vinnytsia National Technical University,
Vinnytsia, Ukraine*

The basic pyroelectric structures and circuits of measuring transducers on their basis are given. The prospect of the use of thin pyroelectric films for the development and design of microelectronic pyroelectric measuring transducers based on transistor structures with negative differential resistance is shown.
